WORK HISTORY

Founder and Full Stack Developer, 07/2025 - Current

Kriyato IT Solutions – Jaipur

- Developed a full-featured SaaS platform using Python (FastAPI), Angular 18, and PostgreSQL, implementing key business modules including authentication with payments, cart & ordering flow, offers, coupons, and stock management.
- Led complete deployment lifecycle — integrated CI/CD pipelines, hosted backend on Render, configured GoDaddy domain, and optimized application performance and scalability for production use.
- Collaborated in product research, UI/UX design, and client requirement gathering, contributing to technical architecture and marketing strategy to align product development with real-world business needs.

Laravel Full Stack Developer, 05/2025 - 06/2025

Dev Technosys PVT LTD – Jaipur

- Developed and maintained scalable video streaming platforms using Laravel seamless user experience.
- Reviewed code, debugged problems, and corrected issues.
- Developed functional databases, applications and servers to support websites on back-end.

Junior Software Developer, 01/2023 - 03/2025

Clover IT Services PVT LTD – Jaipur

- Delivered .NET & Angular solutions, built microservices for background processing for high-throughput requests.
- Implemented secure REST APIs and automated observability (Python scripts) to improve debugging and reliability.
- Integrated AI-driven features using OpenAI models to automate tasks and enhance product functionality.
- Contributed to various technological domains, including React, Mongo and Python time to time with understanding of business logics and core formulas of E-commerce and CRM ensuring versatile development expertise.
- Independently led a Laravel-based project, quickly learn PHP and Laravel, and developed robust REST APIs for Web/Android and Ios, role-based access, MySQL integrations and manage Admin portal using blade component and MVC architecture.

ACHIEVEMENT

- Vice President of the Technical Club, led tech initiatives and mentored students in creating their first technical project.
- Awarded as 'The Charkha Champion' for creativity and innovation at work with different type of technologies and processes.
- Organized 2022 & 2023 Tech Fest successfully, led hackathons, set-up new labs, and contributed to college accreditations.

PROJECT HIGHLIGHTS

- **End-to-End SaaS Development:** Designed and built a fully functional SaaS business management platform using FastAPI, Angular 18, and PostgreSQL, including modules for authentication, payments, cart, offers, coupons, stock, orders, and reporting.
- **AI-Powered Automation & Prompt Engineering:** Integrated OpenAI GPT models for intelligent automation such as personalized content generation, chatbot responses, and workflow-based decision-making.
- **E-Commerce & Service Management:** Developed a hybrid ordering flow combining product and service booking systems, with coupon auto-apply logic and dynamic stock tracking.
- **Full Deployment & Cloud Setup:** Managed CI/CD pipelines, deployed backend on Render, configured GoDaddy domains, and ensured uptime with optimized performance monitoring.
- **AI-Driven Features (Clover IT):** Built automation scripts and OpenAI-based modules for smart email campaigns, translation, and report generation using .NET microservices.
- **Third-Party Integrations:** Integrated external APIs and services including Twilio, Sinch, Infobip, and AWS Lambda callbacks for communication and tracking automation.

EDUCATION

B. Tech: Electronics and Communication Engineering, 01/2023

Poornima College of Engineering - Jaipur

GPA: 8.4
